

ST CANICE'S +

The Needs of a Neighbour

The people of Railaco do not have the facilities that we take for granted. Many children are undernourished; medical help depends on a mobile clinic; roads are largely unpaved; educational facilities need outside support. The problems of the third world are obvious. But the people are warm and courageous.

They appreciate help when it comes and turn it to good account. So, a friendship has developed between the people of Railaco and the people of St Canice's Parish.

Friends from St Canice's are soon going to visit their friends in Railaco where they will see how we have been able to help the feeding of children, the maintaining of a mobile medical clinic and the establishment of a secondary school.

They will be welcomed with genuine affection and they will be proud to learn of the progress of students who have graduated from NOSSEF, the secondary school we have supported. Most importantly, they will strengthen the bonds of friendship between our two communities giving tangible evidence of our common humanity and our equal dignity as children of a loving God.

We are one. We are friends, who have love one for another . . . the comfort of neighbours.
